ISRAEL SURGICAL ASSOCIATION

La Chirurgie Oncologique en Europe

1. La chirurgie oncologique n'est pas reconnue comme une spécialité en Europe
2. La formation est principalement basée sur la spécialité d'organe
3. Peu de standardisation de la formation
4. Très peu de contrôle de qualité pour réguler la formation médicale continue et les maquettes de formation au niveau national

2010 SSO Presidential Address: Subspecialty Certificate in Advanced Surgical Oncology

Fabrizio Michelassi, MD^{1,2}

¹Department of Surgery, Weill Cornell Medical College, Cornell University, New York, NY; ²New York Presbyterian Hospital, Weill Cornell Medical Center, New York, NY

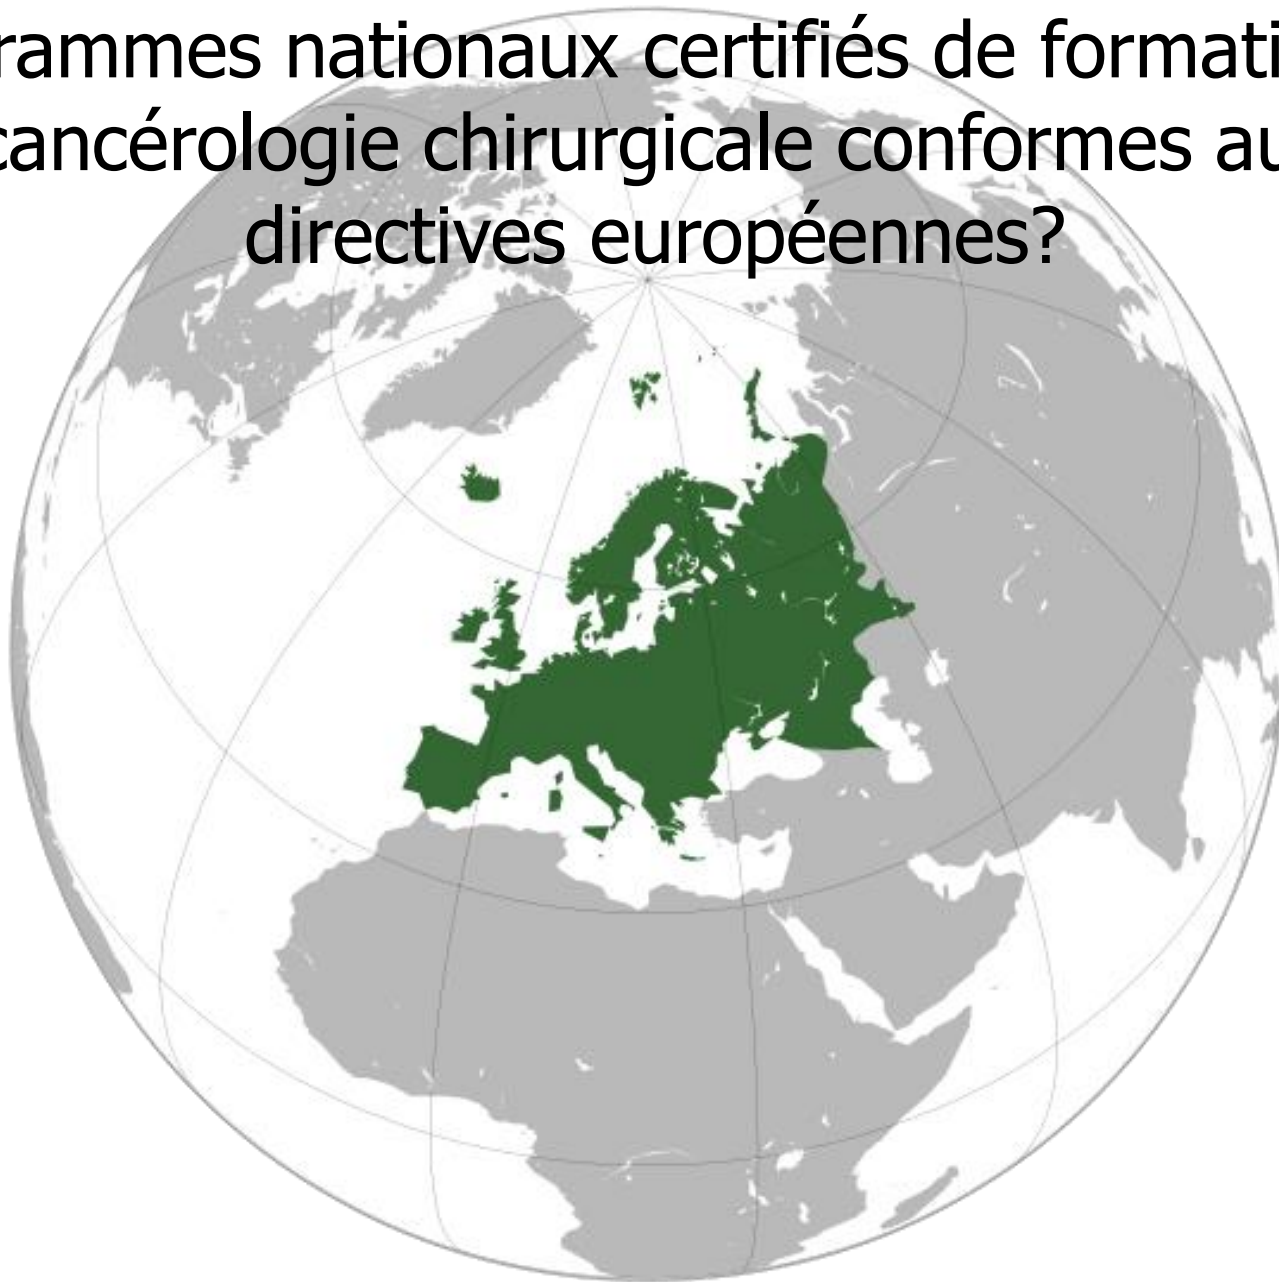

In **June 2009** there was an unanimous vote by the directors of the American Board of Surgery in favor of a subspecialty certificate in

advanced surgical oncology.

*The name reflects the advanced cognitive, research, practice, and leadership skills that differentiate the product of a **surgical oncology training program** from the **general surgeon with an oncology practice.***

Programmes nationaux certifiés de formation en
cancérologie chirurgicale conformes aux
directives européennes?

Union Européenne des Médecins Spécialistes

1. La libre circulation des médecins est inscrite dans la législation de l'UE
2. L'UEMS a été créée en 1958 pour promouvoir la **libre circulation des médecins en Europe** tout en garantissant une bonne qualité dans les soins médicaux.
3. Organisation non gouvernementale qui représente les associations nationales de médecins spécialistes de l'UE et des pays associés.
4. 37 sections spécialisées, représentant 35 pays, sont représentés au sein de l'**European Board of Surgery (EBS)**.

European Board of Surgery Qualification

- L'UEMS a développé un **programme européen et des standards de formation** pour toutes les spécialités.
- **European Board of Surgery** de l'UEMS organise des Examens pour les spécialistes tous les ans.
 - Coloproctology,
 - Trauma Surgery,
 - General Surgery,
 - **Surgical Oncology,**
 - Thoracic Surgery,
 - Transplant Surgery,
 - Transplant Medicine,
 - Transplant Coordination,
 - Endocrine Surgery,
 - HPB Surgery
 - Hand Surgery
 - **Breast Surgery**

Annual Congress

Fellowships

Training fellowships

- ✓ Give insight into oncology care at a foreign specialist institution
- ✓ Help develop skills and increase experience in specific clinical projects
- ✓ Facilitate the development of clinical excellence
- ✓ Show more

Europe

ESSO Young Surgeons Alumni Club (EYSAC) research fellowship

- ✓ Provides training in clinical research in renowned European cancer centers
- ✓ Support the development of excellence in research
- ✓ Provides support to develop surgical oncology research projects

Jeunes

Congress fellowships

- ✓ Assist trainees and young doctors from emerging countries to attend the ESSO Congress

Congrès

Flims fellowships

- ✓ Enable the participation of junior surgeons in the Flims Workshop on Methodology and Clinical Research. The workshop offers:
 - a unique setting conducive to professional relationship building, learning and development;
 - exclusive access to 40 international highly experienced clinical experts;
 - Access to a variety of educational tools to develop a complete protocol.

« One of the best courses
I have ever been to.
The discussions on
clinical cases were
very interesting. Great
speakers! »

Former course participant

Advanced Course on Oncoplastic Breast Surgery

→ BARCELONA (SPAIN)

With an international faculty of well-known experts in the field, the ESSO Advanced Course on Oncoplastic Breast Surgery will explore in depth the novel oncoplastic approach to breast cancer surgery where plastic surgical techniques are used to improve the oncological and esthetic outcomes of breast cancer surgery.

The course will provide a practical, workshop-based approach for surgeons to achieve the best cosmetic results in breast cancer surgery without compromising its outcomes.

Main topics

- › The concept and principles of oncoplastic breast surgery
- › Oncoplastic MDT and treatment planning
- › Surgical resection margin assessment-pathology for surgeons
- › Preoperative planning and role of imaging in oncoplastic breast procedures, marking up
- › Improving cosmetic outcomes by new localisation techniques of non-palpable lesions
- › Level one oncoplastic techniques
- › Level two oncoplastic techniques by quadrants-therapeutic mammoplasties
- › Radiotherapy and oncoplastic breast conservation
- › Esthetic principles of oncoplastic breast conservation and evaluation of esthetic results
- › Contralateral breast symmetrisation
- › Lipomedolling following breast conservation surgery
- › Skin and nipple sparing mastectomy techniques

- › Neoadjuvant treatment
- › Risk reducing surgery for familial breast cancer

Educational methods

- › Video based discussions
- › Case discussions
- › Workshops
- › Oncoplastic MDT decision making tool
- › Plenary lectures

Participants profile

- › General surgery residents with breast interest
- › Residents in breast surgery, surgical oncology
- › Specialist breast surgeons with traditional training
- › Gynecologists
- › Breast surgeons who wish to develop their oncoplastic skills

Update on the planned courses for 2015
